SUMMARY

Software & automation developer with about 2 years of experience at Imara Software Solutions, building full-stack web applications end-to-end and designing automation workflows that remove repetitive manual work from business processes.

SKILLS

Frontend:	React, Next.js, JavaScript, HTML5, CSS3
Backend:	Laravel, PHP, Python, Java, REST APIs
Automation:	Make.com, Zapier, n8n, Workflow Design
Data & Scraping:	Python Scraping, BeautifulSoup, Selenium, Data Pipelines
Mobile:	Flutter, Dart
Databases:	MySQL, PostgreSQL, MongoDB
Tools:	Git & GitHub, Docker, Postman, Linux

EXPERIENCE

Software & Automation Developer — Imara Software Solutions

March 2024 — Present

- Built and maintain full-stack web applications using Laravel, PHP, React and Next.js, from database design through to production deployment.
- Designed and deployed automation workflows in Make.com, Zapier and n8n that remove repetitive manual work from business processes.
- Developed Python-based web scraping tools and data pipelines to feed automations and internal systems with structured, reliable data.
- Built a Flutter Android app for retail point-of-sale, inventory and income/expense tracking, used by small business retailers.
- Shipped automation scenarios integrating PhantomBuster, Airtable, OpenAI and Outlook, covering lead generation, content summarization and reporting.

SELECTED PROJECTS

EC Zoone — eczoone.com — live e-commerce storefront for beauty/skincare products, multi-store cart, filtering, full checkout flow.

Retail Hub — Android POS & inventory app (Flutter/Dart) for small retailers: sales, customers, repackaging, income/expense tracking.

LinkedIn Profile Scraper — Make.com scenario driving PhantomBuster to scrape LinkedIn profiles, parsed and logged to Airtable via OpenAI.

Social Media Summarizer — Make.com scenario that fetches URL content and uses OpenAI to generate ready-to-post summaries.

Outlook Attachments to CSV — Make.com scenario watching an Outlook inbox, pulling attachments, summarizing via OpenAI, saving as CSV to Google Drive.
